SUMMARY

Results-driven Full Stack Software Engineer with 3+ years of experience as an individual contributor in application design and developing scalable, high-performance web applications. Proficient in **microservices architecture**, **API design**, and **system integration**, with hands-on expertise across the **full software development lifecycle- design, development, testing, deployment, and maintenance**. Skilled in both **back-end** and **front-end development**, with expertise in **cloud technologies**. Adept at **solving complex algorithmic problems** and building **customer-focused solutions** using **industry best practices**. **Strong team player** with a track record of **cross-functional collaboration** and delivering **impactful results at scale**.

SKILLS

- **Programming Languages:** Java, JavaScript, C++, HTML, CSS
- **Frameworks & Libraries:** Spring Framework, JSP, JSON, JDBC, Hibernate, RESTful APIs, React.js, Angular, Node.js
- **Databases:** MySQL, Oracle, NoSQL
- **Cloud & DevOps:** AWS (EC2, S3, Redshift), Azure (basic familiarity), Git, GitHub, Bitbucket, Jenkins, Maven, JUnit, Mockito, CI/CD pipelines
- **Tools & Technologies:** Jira, Postman, IDEs (VS Code, IntelliJ), Tomcat, Elasticsearch
- **Other Skills:** Agile/Scrum, SDLC, Object-Oriented Design, Data Structures & Algorithms, Problem Solving skills

WORK EXPERIENCE

InforReel Inc || Software Developer

April 2025 – Present

- **Developed and deployed** content-driven video commerce platform that allows users to discover and instantly purchase products directly from video reels or interactive posts, combining social media engagement with seamless e-commerce transactions.
- **Designed** secure, scalable APIs and query optimization to manage users, carts, orders, and content-driven product mapping, **Integrated Stripe** for payments and KYC, and **Shippo** for automated shipping, enabling real-time order processing and tracking.
- **Deployed** containerized services using **Docker** on **AWS EC2**, configured with **Nginx** reverse proxy and CI/CD pipelines for zero-downtime updates, **Implemented** AWS S3 for storing and managing user-generated media with file access control, validation, and tagging.

DBS Bank || Java Full Stack Developer

August 2022 – August 2023

- **Architected and developed** modular backend microservices using **Java Spring Boot** and **Angular** enabling scalable onboarding workflows for data capture, document verification, risk profiling, and compliance checks.
- **Designed and implemented** RESTful APIs to support secure client-server interactions for onboarding, real-time tracking, and escalation handling across multiple user roles.
- **Automated** build and deployment pipelines via **Jenkins CI/CD**, enabling continuous integration, environment-specific delivery (dev/UAT/prod), and rollback safety for production deployments.
- **Collaborated cross-functionally** with QA and DevOps in **Agile sprints**, contributing to sprint planning, code reviews, and release readiness.
- Conducted rigorous **unit and integration testing**, **reducing bug rates by 20%** and ensuring system stability before full-scale production deployment.
- **Reduced enterprise onboarding time by over 70%** by automating KYC data collection, document validation, and multi-stage compliance workflows.

Harman International || Associate Software Engineer

March 2022 – July 2022

- **Developed** and maintained a modular Claims Management System using **Angular**, **Java Spring Boot** in a microservices architecture to streamline claim submission, approval, and settlement workflows.
- **Built and integrated RESTful APIs** to support secure communication between frontend, backend, and third-party services such as identity verification and payment gateways.
- **Designed dynamic, role-based UIs** for claimants, approvers, and auditors with real-time status tracking, dashboards, and advanced filtering.
- **Implemented JUnit tests** with 90%+ code coverage, ensuring high code reliability and reduced production defects and **Reduced claim processing time by over 60%** via automation and real-time validations.

YKS IT Services || Full Stack Developer

January 2021– February 2022

- **Developed and deployed** a fully functional e-commerce web application, enabling users to securely browse products, and place real-time orders.
- **Designed and implemented RESTful APIs** using Node.js and Express to handle user authentication, shopping cart actions, product display, and order processing with high performance and security.
- **Implemented secure user authentication** with JSON Web Tokens (JWT), providing protected access based on role-specific permissions.
- **Containerized the full application** using Docker, ensuring consistency across development and production environments, and deployed it on **AWS EC2** for reliable and scalable access.
- **Improved order processing flow** by automating tasks such as order confirmation and status updates, reducing the need for manual handling and enhancing customer experience.

YKS IT Services || Web Developer Intern

October 2020 – December 2020

- **Contributed to full-stack development** of a web-based e-commerce platform by implementing key features such as product display, cart updates.
- **Developed RESTful APIs** using Node.js and Express to handle user authentication, order submission, and data retrieval between client and server.
- **Developed reusable React.js components** for product listings, shopping cart, and user dashboards, improving code modularity and UI consistency.
- **Performed API testing and debugging** using Postman and developer tools, ensuring functionality, security, and performance of integrated features.

EDUCATION

- **Master's in Computer Science**
University of Dayton | **CGPA: 3.8 / 4.0**

Aug 2023 to Dec 2024

ACHIEVEMENTS

- Received **"Super Tech Rookie"** award for being best performer consequently for 3 quarters. Certified Titan Bronze level in Application Security.
